SnCl₂·2H₂O; a precious addition to catalyst range for synthesis of bis (indolyl) methanes

KA Shaikh *, ZA Mohammeda, NT Patela, SA Syedb, Vishal A Patilb

ABSTRACT

An efficient, fast and high yielding protocol for the solid -phase synthesis of bis (indolyl) methanes via electrophilic substitution of indoles with various carbonyl compounds catalyzed by stannous chloride dihydrate. **Keywords:** Indoles; aldehydes; ketones; bis (indolyl) methanes; stannous chloride dihydrate.
